HEALTH INFORMATION HUB™
FOR HOSPITALS

Truly Connected Health Information

Health Information Hub™ facilitates the automatic, bidirectional exchange of data connecting hospitals EMRs/EHRs with EMS, EMRs/EHRs, HIEs, outcome data, billing, and registry information. This Integrated solution allows providers – from EMS to trauma departments – to gain a perspective of the full spectrum of patient care.

Integrate with EMS

Health Information Hub (HIH™) allows EMS ePCRs to be sent directly to the hospital saving valuable time at hand-off, enabling seamless communication and allowing the hospital to be prepared in advance. When used with Hospital Hub™, hospitals can even be alerted of incoming patients by EMS. Additionally, this integration streamlines patient record matching and data entry, resulting in much fewer or no errors. Registrars can save hours in abstracting records and have more accurate data to report and base decisions on.

Highlights

- Better pre-hospital knowledge
- Easily report and analyze all data
- Optimize staffing levels through data
- Eliminate paper and ink costs
- Reduce hospital FTEs
- Enhance patient care

Connecting Hospitals to the Community

The exchange of information doesn't stop with hospitals, HIEs and EMS agencies. Interoperability expands to include the community through integrations with primary care, specialists and other post-discharge options, such as home care and community paramedicine programs.

HEALTH INFORMATION HUB™
FOR HOSPITALS

Carequality Treatment Query

Receive the most complete patient health information prior to patient arrival with access to Carequality's national network of more than 600,000 care providers, 50,000 clinics and 2,800 hospitals through HIH. Easily search for patients' past medical history, allergies and current medications and pull crucial data into the patient's current care record.

Flexible Exchange Methods

ImageTrend partners with leaders in interoperability to share data via a multitude of exchange methods. These include query lookup and automatic data exchange through direct messaging, web services, VPN and MLLP socket connections, and more.

The Complete Picture

Connected data opens the door to new possibilities in integrated healthcare. Understanding the care a patient receives throughout the healthcare cycle gives you better knowledge of where efficiencies or processes are lacking, and allows you to influence policy change. Creating reports that help you visualize not only the data your center collects, but what other departments collect, gives you the tools you need to plan strategic initiatives. ImageTrend's solutions leverage powerful software to analyze, document, alert and report on data - making patient-centric care a reality.

INFLUENCE THE DIRECTION OF HEALTHCARE.
