IMAGE*TREND*®
CONTINUUM™

Active Data Monitoring™

Transform raw data into actionable insights. Continuum® actively analyzes data within ImageTrend systems to deliver notifications and easy-to-view information without building a single report.

Dashboards

Empower your organization to schedule and track resources beyond a base schedule for day-of or special events, non-employee personnel and more.
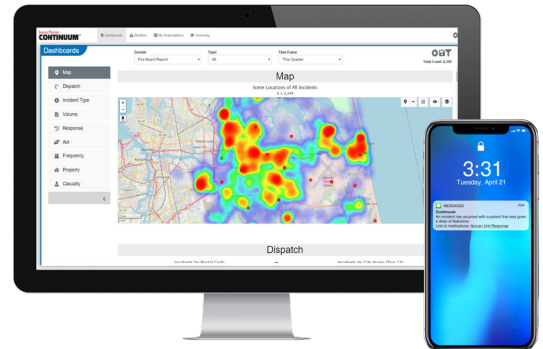

* **EMS:** 911 response, patient care and care delivery efficiency for medically trained responders and agencies

* **Fire:** Firefighting response, reduction in property losses and safety of firefighters and community members

* **Hospital:** Quality improvement and response to trauma, stroke and cardiac in the hospital and acute care setting

Alerts

Stay on the pulse of your organization's data with near-real time or scheduled alerts. Choose from a library or configure alerts for metrics of choice and who will receive them via text or email.

Playlists & Shared URLs

Create playlists featuring content from multiple Dashboards and access URLs specific to individual maps, charts and/or tabular reports. Link playlists and URLs to internal and external webpages or display on monitors throughout your organization to reach your stakeholders without them needing to log into Continuum.

Performance Insights™

Drive quality improvement initiatives through provider and organizational level situational awareness with insights into industry trends, clinical and operational metrics, incident specific detail and patient interactions.

CONTENT PACKAGES

Fire Content Package

Delivering key information on fire operations and department performance. Access tools to streamline accreditation process.

Dashboards include:

- Fire Accreditation
- Fire Incident Performance
- Fire Unit Performance

Content within the above include:

- Aid Given and Received
- Arson
- Casualties
- Crew Participation / Call Attendance
- Data Quality and Completeness
- False Alarms
- Fire Information
- Fire Losses / Saves
- Hazmat
- Historical Demand and Trends
- Incident Status
- Incident Types
- Overlapping Calls
- Reliability
- 90th Percentile Response Metrics
- Technical Rescue
- Unit Hour Utilization

Datasets

The following is a list of Continuum datasets.

- Agency
- Agency Location
- Cardiac
- Checklists
- Community Health Patients
- Community Health Programs
- Community Health Visits
- EMS CAD
- EMS Incidents
- EMS Rapid Alerts
- Export History
- Facility
- Fire Incidents
- Fire Investigation
- Import History
- Inspections
- Inventory
- Locations
- Occupants
- Permits
- Personnel
- Stroke
- Training / Activity

EMS Content Package

Gain complete insights on the delivery and performance of emergency medical services.

Package Dashboards include:

- At Risk Populations
- CA Core Measures
- Cardiac
- Cardiac Arrest
- Clinical
- Crew Insights
- COVID-19 Indicators
- EMS CAD
- EMS Compass
- EMS Data Quality
- Maternal and Pediatric
- Medical Dispatch
- Offload Times (APOT)
- Population Health
- Public Health
- Stroke
- Suspected Overdose
